TILJALA SOCIETY FOR  
HUMAN AND EDUCATIONAL DEVELOPMENT

Committing to Rag Pickers Survival and Ensuring Womens Empowerment through Education

Annual  
Report  
2014-15

# TILJALA SOCIETY FOR HUMAN AND EDUCATIONAL DEVELOPMENT

## Mission Statement:

To enable people of India and international communities to take responsibilities for the deplorable situation and sub-human conditions of deprived children and vulnerable women in India and motivate them to confront the situation through cohesive action and sponsorship.

Tiljala SHED is a grass root organisation working tirelessly towards restoring the basic rights of the marginalised through social participation. We are a non-political organisation and do not subscribe to any religious, corporate or racial sentiments. It is not that we are un-biased, we speak for those who are deprived. Such a mindset allows us to go beyond welfare and to become a credible voice for those who are the "un-wanted".

We believe in the real spirit of partnership (donors, NGOs, media) and peoples ownership of the projects. With a first-hand feel of the communities priorities, we have created an iterative learning process in areas of program planning, monitoring and evaluation. We are assiduous about observing the highest standards of accountability and transparency in all affairs of the organisation.

## GOAL

Tiljala Shed envisions a proletarian society free from hunger, inequality, gender bias, injustices so that people can lead a dignified life free from exploitation, ensuring freedom of expression.

## FROM THE SECRETARY'S DESK

*“Please make some arrangement for water in our area!” pleaded Monohara Bibi, a rag picker living in the railway squatters settlements near Park Circus railway station. A place where availability of water is all a person can aspire for - Welcome to a world of deprivation! Imagine a life without something as basic as sanitation, electricity, water and regular meals.*

*We talk of “Swachh Bharat “(clean India) but when you are living in an area surrounded by garbage the word “Swachh” loses its meaning for the residents. Life is difficult in this harsh environment.*

*The quality of drinking water supplied by municipalities is of an inferior quality. According to statistics, every 21 second a child dies because of water borne disease. Unhygienic sanitary conditions only exacerbate the pace at which diseases spread. More people die out of water borne infections than AIDS, tuberculosis and accidents. In a locality where 20 families are staying, there are provisions for just one toilet. The public sanitary complexes have been built without any provision of running water. This results in soiled and infected toilets.*

*Recent data on child births reveals that 21% of the world's child mortality is taking place in India. Every year around 7,60,000 babies die within the first month of birth and the irony is that a large percentage of these newborn deaths are preventable.*

*Child mortality in India needs urgent focus and a need to address the health system gaps across the continuum of care in India. In our society we have people who pick up garbage from the streets with their bare hands they are called rag pickers but their contribution is not recognised by the society. They live a life of exclusion and are shunned by the public at large. They eke out a living by selling whatever they can salvage from the streets. The recent installation of garbage compactors by the Kolkata Municipal Corporation has adversely impacted their earnings. Without proper segregation of waste, all the waste is mixed and dumped into the compactors. This has resulted in a colossal damage to the ecological balance of the city. The mixed garbage from compactors is of no use as recyclable materials present in the garbage are lost forever. Women and to some extent children are subjected severe violence and verbal abuse by the very people who should be protecting them. It is imperative that we introduce the concept of “safety net” to protect this vulnerable section. The community must be made aware on how to protect children from being abused by perverts. This reporting year was a disaster for the Park Circus Railway squatter settlements as there was a huge fire which gutted more than 250 huts and burned away most of their belongings.*

*Majority of the population consists of the Rag Pickers community which was largely affected by the fire. Tiljala Shed launched a big and emergency relief camp which provided the fire victims with food, bamboos, tarpaulin, plastic sheets, construction materials, household utensils, clothes and many more household and daily life items. Misereor was the biggest contributor for the emergency response followed by HRF (UK). Some in kind donations were also made by a small number of individuals for the community. The role of Daan Utsav team, Mudar Patherya, Amada Kidwai, Goonj, Avik Saha and many other supporters was commendable in terms of rehabilitation of fire victims. Tiljala Shed continued the rehabilitation and relief work for more than four months.*

*A shelter home is being run by us for highly vulnerable rag picker children who were earlier involved in violence and drug abuse. They were neglected and many were malnourished but our love and care had significantly improved their health .They are now all attending school and we are confident that they will turn out to be responsible citizens. This has taken place because Misereor which is a German Roman Catholic church Organisation for Development Cooperation has extended selfless support to the rag picker community. Tiljala SHED not only provides them with education, healthcare, livelihood and nutrition but is trying to empower an organisation exclusively for the rag pickers called The Association of Rag pickers of Calcutta. This organisation is working for claiming their rights and entitlements from the government and will be managed by the rag pickers themselves.*

*AIDOS- Italian Association for Women in Development has supported destitute girls and women to change their lives through education. The sponsorship is a flagship program launched in Kolkata some twenty years back. It has positive impact in the lives of all those girls associated with the project. This is an unique project because it gives the beneficiaries unstinting educational support till they complete their graduation. In some cases they have supported till post graduation. They have been our steadfast partner for a very long time and we are confident that they will continue supporting the program for many more years to come. President of AIDOS Maria Grazia Panunzi and Vice President Paola Cirillo is deeply involved in the project and they take personal interest in the project`s development and implementation. AIDOS has also helped to build a library-cum-internet multipurpose hub inside the Park Circus slum which is patronised by the direct beneficiaries of the project and girl students from the slum.*

*Tiljala Shed is in partnership with Action Aid India is involved in seven districts of West Bengal. The project envisages scaling up the leadership qualities of local community leaders.*

*We are implementing some government projects viz. ICPS (Integrated Child Protection Scheme- Open Shelter Home) and KNCLP (Kolkata National Child Labour Project). ICPS is a major program of the Indian Government and its primary aim is to provide an opportunity for the increasing number of vulnerable children in urban areas to be protected from abuse and neglect and wean them away from street life and enable them to lead a dignified and productive life. Another project on awareness building for the public at large on two specific issues is supported by KUSP (Kolkata Urban Services for the Poor- a DFID funded project) It is being implemented in all the 35 wards of Rajpur-Sonarpur Municipality on prevention of Malaria and water borne diseases and scientific plastic waste disposal.*

*On a personal note we wish to extend our wholehearted gratitude to Cognizant Technology, TATA Consultancy Services, Science City, Indian Institute of Foreign Trade, (a renowned MBA institute of Kolkata) , HSBC for donating their valuable recyclable waste for the cause of the Rag Pickers. I would like to extend my thanks to Calcutta University, Jadavpur University, ITM Mumbai, Indira Gandhi National Open University for sending their students to work as volunteers in our organisation. On a concluding note I wish to state that our organisation will strive to help the marginalized communities in whatever way we can with the active support from our donors both national and international.*

8.	Ms. Uma Pandey	Member	Nurse
9.	Ms. Reshma Ahmed	Member	Home Maker
10.	Ms. Subhra Banerjee	Member	Social Activist
11.	Ms. Jamila Khatoun	Member	Home Maker

## Ongoing Projects

### Socio-Economic Project

#### Rehabilitation, Social Development Economic Self Sufficiency of Waste Pickers and Urban Ultra Poor in Kolkata Metropolis

A comprehensive project on the socio-economic development of the Rag Pickers community. The project is focussed on the holistic development of the 350 Rag Pickers and 50 urban ultra poor families.

**Reduce, Reuse, and Recycle** are three R's for energy conservation and environment. After emphasizing so much on reducing, reusing, and recycling Tiljala Shed decided to take a stock of the recycling scenario in India. The feedback was shocking to say the least.

Western nations are quite advanced in the recycling business. The public come and dump their waste only in garbage vats. The vats are designed in such a way that the waste is segregated at source. There is no such system of segregation in India. The recycling system is still not regulated hence most of the recycling is not done in a scientific manner this results in huge emission of toxic fumes at the time of processing the plastic waste. It is imperative that the authorities introduce a viable and safe methods of recycling waste. A substantial amount of recycling materials are collected by rag pickers. Thousands of rag pickers scrounge through filth and muck to retrieve precious recyclable materials in our city. As they sift through garbage unprotected, their body absorbs toxins prevalent in the garbage. Some of the rag pickers suffer from degenerative cervical disease because they remain hunched for hours while segregating the waste materials.

Delhi generates over 7000 MT of waste daily. Kolkata is not behind with 5372 MT per day. There is a range of materials that are picked up by these rag pickers: plastics, paper, glass, cartons, metals, etc. Studies estimate that these informal labour forces save the Kolkata Municipal Corporation and other Municipalities a couple of lakhs of rupees daily.

Rag Pickers sell their waste to the wholesalers who then sells it to the recycling plant. The wholesaler will insist on segregation of the waste materials and will pay very little if the materials are soiled in anyway. This is an exploitative business.

It is sad that rag pickers who pick up the garbage and contribute to the improvement of our environment are harassed by police, public and municipal workers. They sometimes need to bribe municipal workers to forage the garbage bins. Police, instead of protecting

them, often beats them and initiate false charges against them and lock them up. Local rowdies also snatch away their hard-earned money. Landing them in debt thus forcing them to borrow money from the local moneylender. They get trapped in a cycle of debt and destitution. These rag pickers are not beggars. They are very hardworking. We need to recognize their effort and protect them from exploiters and abusers.

The Association of Rag Pickers of Calcutta a legal registered body for the Rag Pickers. The drive for membership is on and many Rag Pickers are now registering themselves to claim their rights and entitlements from the government. The Association has still a long way to go to truly function as an independent body representing the rag pickers of Kolkata. Recently the Rashtriya Swasthya Bima Yojana (RSBY) –a smart card based cashless government health insurance scheme –was extended to cover the unorganized sector, including the rag pickers.

Tiljala Shed receives unstinting support from Misereor (Germany) to transform the lives of the Rag Pickers. The project is being implemented in five pockets like Park Circus, Topsis, Tangra, Mir Meher Ali Lane, and Narkeldanga. Besides this we are also running a childrens home at Mouli Mukundo village where 25 children from Rag Picker families are staying.

### **PARK CIRCUS FIRE RELIEF & REHABILITATION**

On April 5, 2014 a disaster that ravaged around three hundred households at the Park Circus squatters adjoining the Park Circus Railway Station at Kolkata as per the testimonial of a local resident of the squatter. The unfortunate event escalated out of an electric spark from a bundle of high voltage wire. The sparks were observed at around 11.30 p.m . The sparks transformed into flames as dry polythene, bamboos and clothes become tinder. The flames spread faster than wild fire. Gas cylinders, kerosene, adhesive solutions added fuel to the fire and flames raised to a height of over forty feet. The rising flames generated so much heat that it melted the overhead high voltage power lines of the railway track. The fire brigade arrived only after an hour and by then the flames had engulfed most of the houses on either side of the railway tracks. It took twenty eight fire engines six hours to douse the flames.

Tiljala Shed flung into action for the relief and rehabilitation of the fire victims. There were no casualties but some people got injured in this fire tragedy. Most of the people lost every thing including money and other household items and they were left with nothing with them. We got tremendous support from Misereor, Human Relief Foundation, Avik Saha, Hyatt Regency Kolkata, Sabyasachi Sen, Panchali Sen, Amada Kidwai, Rural Healthcare Foundation, La Martiniere for Boys, Mudar Patherya, Naturoveda, Daan Utsav Team and many other donors who contributed to the relief and rehabilitation of the fire victims. Tiljala Shed continued the rehabilitation work for more than four months. We thank all the donors and supporters for their emergency response to the fire victims of Park Circus.

Huts gutted in the fire

### Rice Bucket Challenge at Ladies Park on 07.12.2014:

Rag Pickers and other marginalised community at the queue for the Rice on the occasion of Rice Bucket Challenge

A rag picker women receiving rice at the Rice Bucket Challenge which was organized in association with FACES

### Health

The health program of this project has helped many rag picker families to address their health concerns. As they are engaged in a profession where health hazards are very high. Our intervention covers awareness meetings on various diseases which affect them adversely. We conduct health camps at regular intervals in all the areas of our intervention. The Rag Pickers community are averse to immunization as they are under a false notion that immunization is actually detrimental to health. Through this program we were successful in convincing them why it is essential to immunise their siblings between the ages of 0 to 5 years. Earlier home deliveries were a very common phenomenon resulting in high child mortality while giving birth. All this has changed, now majority of the pregnant woman goes to the local government hospital to deliver their child. Beside low mortality rate, the child is

assured of a birth certificate at the time of discharge. Our health workers also monitor ANC and PNC in a regular way. We also aware them on issues which directly affects them on topics like domestic violence, dengue, malaria prevention, saving habit, life insurance etc.

### Health Indicators for Pregnant Women

Sl. No.	Indicator	Total No. of pregnant women	Hospital Delivery	Home Delivery	Success Rate (in %)
01	Number of women are visiting hospital for institutional delivery	34	27	5	79.41%
02	No. of Pregnant women left their children with other families or relatives during delivery	34	27	5	79.41%
Sl.No.	Indicators	Total No. of Pregnant Women	Total No. of women registered and accessing regular check up	Total No. of women unregistered and did not access regular check up	Success Rate (in %)
01	No. of mother accessing ante natal check up (ANC)	34	34	0	100
02	No. of mother accessing Post Natal Care (PNC)	34	27	5	79.41

\*\* 2 women delivery awaited and hence no question of PNC arises

### Health indicators for children under (0-5 yrs)

Sl.No.	Indicators	Total No. of children (0-5 yrs)	Total No. of children immunization going on	Total No. of children who are not continuing immunization	Success Rate (in %)
01	No. of children who got immunization	226	127	99	56.19

Health indicators ➔	Total No. of Health Camps	Total No. of patients	Total No. of patients referred to govt. hospitals	Total No. of patients cured after referrals	Total No. of patients continuing their treatment	Total No. of patients not continuing their treatment	Total No. of patients cured	Type of illnesses/diseases throughout the year
	55	1899	28	20	115	8	1776	Diabetes, asthma fever, cough & cold skin rashes, skin problems acidity, weakness, worm infestation, loose motion diarrhoea, dental pain headache, body ache, white discharge, ear pain, anaemia, thyroid, high blood pressure, cuts, boil, menstrual related problems, etc.

### Waste Collection:

The solid waste collection from corporates is one such thing that Tiljala Shed has developed over the years. We have been able to convince several large corporate houses to support the rag pickers by donating their recyclable waste. We also connect them with shopping malls, amusement parks, residential complexes for collection of solid waste. The waste collection gives the rag pickers a golden opportunity to enhance their income as well as raise funds for the Association of Rag Pickers of Calcutta (ARP).

Solid Waste Collection from Science city by our Rag Pickers

The list of the corporate contributors along with the quantity and the type of waste and value of the wastes are listed below:

Waste Collection (Gross) Name of the corporate	Type of waste (in kgs)	Type of waste	Amount (in Rs.)approx.
Cognizant Technology Solutions (Bantala)	49388	Paper, Plastic, Metal, Cardboard, coffee cups	118650
Science City Amusement Park	25068	Paper cups, pet bottles, paper glass, ice-cream cups	12500
TCS EDEN	1177	Shredded paper	9416
TCS VICTORIA	325	Shredded paper	2600
TCS SDF	75	Shredded paper	600
TCS ECOSPACE 1A	230	Shredded paper	1840

BAISHAKHI APARTMENT	6543	Old newspaper, pet bottles, cartons	6100
		<b>Grand Total</b>	<b>219690</b>

## **Rural Intervention** **Aasra Sadan**

Our children Home which was inaugurated three years back to cater to the needs of 25 highly vulnerable rag picker children. These children have been identified by the community workers as victims of sexual and physical abuse, children neglected by their parents and some were even drug addicts. They were prone to violence amongst their peers and many were malnourished. Now they are in safe hands. They are protected from the evil forces which almost destroyed their lives. The children now get regular wholesome meals which keep them healthy. They go to a nearby government school and our qualified teachers coach them after school hours. They are encouraged to take part in outdoor games as well as in cultural activities. The children initially were very violent and would often fight among themselves but now they are totally transformed. They are much more receptive and co-operate with the minders. Their attitude has changed tremendously and they do not use cuss words while talking. There are still some children who are weak in studies but we are hopeful that they will eventually catch up with the rest of the boys. We have engaged them in gardening for mental peace and introduced calisthenics to keep them physically fit. We keep touch with the state government child protection department to get support for our childrens home. We are very indebted to Misereor and Indien Kinderhilfe for their selfless support for the children home.

**South Point School donated bed sheets, 26.11.2014:**

**Generous donation of 60 bedsheets by South Point School for our childrens Home on 26.11.2014 at the South Point School Premises.**

### **Clean City, Green City**

A Walkathon organized by Lions Club on 14th Dec 2014 for spreading the message of cleanliness. Members of the Gyan Azhar Library and girls under sponsorship program participated in the walk for promoting the cause.

**Andreas Noak Visit, 11-17 February, 2015:** Andreas Noak from Berlin, Germany on his second visit to Tiljala Shed. His meeting with Shafkat Alam at the Misereor Lenten Campaign in 2012 was the first encounter with Tiljala Shed. Since then he had made two visits to Kolkata and is one of the important supporters of our organization. The children adore him as he is very good in interacting with them.

Andreas Noak with the children at the Open Shelter Home at Park Circus

Andreas Noak at the Childrens of Rag Pickers Home at Mouli Mukundo village

**GKB Lens Eye camp and free glasses distribution at Narkeldanga on 24.03.2015:**

Beneficiaries with their spectacles distributed by GKB Lens

Karimun Bibi, a rag picker by profession received her spectacles from GKB Lens

GKB lens conducted two eye camps at Narkeldanga which was attended by 176 people on 27.01.2015 and 29.01.2015. This initiative has largely benefitted the Rag Pickers community. Free eye check up was done and after two months all eligible patients were given spectacles for free of cost. This was a CSR activity done by GKB Lens.

### Sponsorship Program for Destitute Girls

This is a project whose primary aim is women empowerment. This is a flagship program which enables the girl child to be educated and become the community leader of tomorrow. In a society like India where women face oppression and violence from their male counterpart. This project has forced the stereotype Indian society to rethink and invest in girls. The program has been running successfully for the past two decades and many new young girls have come forward to make a desired change in our society. Many were first generation learners in their family. This program gave an opportunity to the girls to study and stand on their feet. This program has had a ripple effect and many families change their mindset and have started educating their girl child as they have now understood the importance of education. All the credit goes to AIDOS- Italian Association for Women in Development an organization based in Rome, Italy.

The President of AIDOS Maria Grazia Panunzi and the Vice President Paola Cirillo takes a lot of interest in this project. AIDOS extends support in school fees, tuition fees, stationeries, uniforms, shoes among others to the sponsored girls. Some girls become drop outs because of early marriage. We are also conducting awareness and workshops with these girls and educating them on various important topics like the negative effects of early marriage, menstrual hygiene, reproductive child health and many other issues which touch their lives. We strongly believe that educated mothers produce educated children. Regular medical camps are organized for them. Many national and international interns interact with the project girls and conducts various type of training to them including leadership building.

## Sponsored girls Performance Chart 2014-2015

No. of Girls under the programme as on 31.3.2015	No of Girls passed	No. of Failure	Result yet to be declared	No. of girls not appeared in the exam	Vocational Tranning
72	45	9	5	11	2

# Sponsored Girls Classwise Chart 2014-2015

No. of Girls under the Programme as on 31.3.2015	No. of Girls enrolled during 2014-2015	No. of girls Studying between Class I to IV	No. of Girls Studying between V to VIII	No. of Girls Studying between IX to X	No. of Girls Studying between XI to XII	Graduate & Post Graduate	Vocational Training
72	0	4	31	18	4	13	2

### Gyan Azhar Library:

A ray of hope and acquiring knowledge in the lives of our sponsored girls. The girls living in the shanties could have never imagined that a Library cum internet point would start functioning in their locality. It was possible only because AIDOS-Italian Association for Women in Development came forward and lent their support in establishing this Library. This library gives the girls a space for their studies and also to browse through hundreds of books covering diverse topics. This library is meant not only for sponsored girls under the project but also for non sponsored girls. Now more non sponsored girls have become members of our library and are regular users. We organized regular documentary films on social issues and sometimes show cartoon films for entertainment purpose. We have a good variety of indoor games where the girls come and play. We also conduct various trainings on English speaking and writing, basic computer courses, leadership training, etc. More innovative programs are on the cards. We are aspiring to build the library into a building where we can access more space and more girls can be accommodated in the library. More programs and events can be designed for them making it a fountain head of knowledge and skill building hub. The girls also attend workshops on performing arts such as singing and dancing along with acting in short plays which has a message to the community people. Some of the girls are also involved in vocational training which will help them to earn their livelihood in future.

## Statistics of the Gyan Azhar Library

Month	No. of Library User	No. of Books Issued	No. of New Members	Total No. of Members enrolled till date as on 31.03.2015
April 2014	225	24	3	633
May 2014	314	13	3	
June 2014	301	20	4	
July 2014	274	12	0

December 2014	808	25	1	
January 2015	559	9	6	
February 2015	460	16	7	
March 2015	572	8	8	

### Annual Sports: 21st February, 2015

The Annual Sports is an event which children look forward to. This athletic event helps to inculcate a spirit of competition and sportsmanship amongst the children. This event teaches them to excel in a particular event of their choice and face challenges. It is a pleasure to see the smiling faces of children who have won in their respective events and take away gifts and medals.

**Thank you Emanuele Uncle, Michelle Aunty, Tamae Gennai and Pierre Deveaud (Switzerland)**

Alisha Ali, Nafisha Ali and Anareasha Ali are three siblings and they are being sponsored by the Swiss family. The family is closely related to our organization for the past one decade and has been supporting our organization for a very long time. Alisha, Nafisha and Anareasha father is a tailor and hence cannot afford to send their child in a good English medium school. The Swiss family came forward and extended their support and since then there have been no looking back. It is because of this family that the three girls of this family is able to continue their education and most importantly they are the first generation learners of the family.

**Thank you Dr. Beatrice Rossillon (Switzerland)**

Dr. Beatrice Rossillon, a doctor by profession extended her support to Halima Khatoun for providing her all the educational support. Halima lives in the Park Circus Railway squatters where the environment is not conducive for a child development and hence Halima is now living in a hostel where she is going to school and leading a much disciplined life. Thanks to her sponsor for changing her life.

She is very weak in studies and the institution is working hard to improve her education quality. Tiljala Shed staff does regular monitoring and regularly visits the hostel and the school where her development is closely monitored. Halima's is coming from an extremely marginalized family and most of her family members are rag pickers. She is the first generation learner of her family and is expecting to bring about a change in their community.

**Thank you Kevin Mansell and Celia Mansell (UK)**

Kevin and Celia are wonderful couple and a born philanthropist. They have been supporting our organization for the last one decade and has been very supportive in all our endeavours. Last year also they donated 500 GBP for the cause of our organization. We are very thankful to them.

**Thank you Petra Rauch & Kurt Caspari (Germany)**

The couple from Germany Petra Rauch and Kurt Caspari have been our long term supporters and our strongest supporter in Germany. They visit our organization every time they come to Kolkata and monitor the development of the programs they have donated for. They are regular in touch with our organization and encourage other friends also to donate for our cause.

### **Thank you Sebastien Haye (France)**

Sebastien has been a part of Tiljala Shed and his association dates back from 2003. Since then he had made many contributions from his side and also organize donations for different programs from different agencies internationally. He has been a major source of support for our organization. Currently he lives in Geneva, Switzerland.

### **Thank you Jane Manson (UK)**

She is Tiljala Shed's new Global Fundraising Director. Tiljala Shed encounter with Jane Manson was one of the best things that happened in 2015. We met her at Kolkata Gives exhibition where we exchanged a lot of ideas and then our new Joint Secretary went to visit her in London while returning from United States. She will be raising funds for our programs globally by forming a strong network of donors. Currently we got selected in the Global Giving challenge because of her efforts. She has pledged her full time and support for the organization. She has visited twice and have witnessed our work from her eyes and has pledged her full support for the cause of the organization.

### **Thank you Mr. George Sibley & Ms. Lee Alison Sibley (USA)**

One of the top most American diplomat currently stationed in US Embassy, New Delhi Mr. George Sibley and his wife Lee Alison Sibley have been a staunch supporter of our organisation for more than a decade. They have supported many times and have been an inspiration for our organisation. They truly believe in the cause of the organisation and have always extended their support beyond our imagination.

## **MEDIA COVERAGE**

The Times of India covered the story of Tiljala Shed's literacy mission on 7th February 2015. Tiljala Shed has been continuously engaging with media for the larger interest of the marginalised population.

### Dowry Death Case of Nikhat Kauser:

This most unfortunate incident has shocked the community. It occurred on 1st August 2012. This shocking incident occurred with one of our sponsored girl Nikhat Kauser whose in-laws are purported to have burnt her alive. She was married when she was 19. Her husband went to Dubai for work. Her family lives in the railway squatters of Auddy Bagan. Her father is a rickshaw puller and mother is a maid servant. Her family dream to marry an NRI turn into horror when the news came of her unnatural death. She died in the hospital with 90% burns. It was impossible to save her with such extensive burns. The family members who are mostly illiterate did not know what to do. They approached Tiljala SHED for help. Tiljala SHED hired a lawyer to bring the culprits to justice. Family members of the husband were arrested but they are presently out on bail. The case is still on and we are hopeful that the perpetrators of such a heinous crime will eventually be punished. We have moved to Human Rights Commission and Women's Rights Commission and also intimidated the Chief Minister of West Bengal. But the judicial process is very slow and one has to wait for a very long time to get the final verdict which will surely be in favour of the victim.

### Mass Food Distribution (Iftar Program) 2014 supported by Human Relief Foundation (UK):

Massive Iftars were organized during the holy month of Ramadan for more than 2000 people. The beneficiaries included orphan children, destitute, widows, maid servants, rag pickers, rickshaw pullers, van pullers, masons, people living in the slums, squatter and pavements. Many varieties of food were served to the beneficiaries which included different types of fruits, fries, Haleem, pudding, grams, rice and other delicacies. This special program supported by HRF main intention is to give underprivileged people who fast a wholesome Iftari (food eaten after breaking the fast at sunset) This program was organized in different slums like Topsia, Tangra, Park Circus, Narkeldanga and Mouli Mukundo Village - childrens hostel.

**Trial Food Program 2014 supported by Human Relief Foundation (UK):**

HRF flagship program continued their partnership with Tiljala Shed for the second successive year and once again more than 4000 families were benefitted from this trial food program. HRF seeks to promote sustainable economic and social development by working with local communities through relief and developmental programs. It also provides emergency relief assistance to people caught up in extraordinary life threatening situations.

We implemented the trial food program in the form of providing meat to the underprivileged communities during the festival of Eid-uz-Zuha. Thousands of families got the meat packets in all the areas of our intervention. The meat was also distributed in the far flung areas which included the Sunderbans (Gosaba).

**Open Shelter Home (Integrated Child Protection Scheme)  
supported by Ministry of Women and Child (Govt. of India)**

The Open Shelter Home for destitute boys is one of the flagship program of Government of India. ICPS objectives are to contribute to the improvement in the well being of children in difficult circumstances as well as to the reduction of vulnerabilities to situation and action that lead to abuse, neglect, exploitation, abandonment and separation of children.

The ICPS brings several existing child protection programmes under one umbrella and initiated new interventions. Any vulnerable child in need of care and protection particularly beggars, street and working children, rag pickers, small vendors, street performers, orphaned, deserted, trafficked and run away children. The program caters to the age group 6-18 years.

Program in brief The outreach workers identify 30 children from their contact points at Topsia, Tiljala & Christopher Road. Nevertheless 25 flying students attend our Open Shelter Home and utilize the facilities which the inmates of the home enjoy, e.g. indoor games, watching tv, use toilets, computer games, etc. The three contact points which we have established also cater to the educational needs of more than 120 students on an average.

### **KNCLP Supported by Ministry of Labour, Govt.of India**

This is a very old program of the Government of India. The main aim of this old program is to withdraw the children who are involved in child labour. Tiljala Shed has been implementing this project for many years and has been entrusted by KNCLP to take care of fifty children who are involved in hazardous jobs for the past five years. Children are provided as per their needs to prepare them for mainstreaming in formal schools. The components of this program are mid day meal, bridge courses, skill and vocational training and other needs to help them attain primary schools like other children. A stipend of Rs.150 per month per child is given to all the children who attend the schools regularly and give up the jobs. The child must have a minimum of 80% attendance and maximum 85% attendance. The stipend is calculated on the basis of maximum attendance. A savings bank account is opened in the name of the child and the stipend is deposited in that account. Vocational training in viable trades are also imparted to the children.

Total Children	Age Group (9-12 yrs)		Kind of occupation	Earned per week/month	No. of Bank Accounts Opened for Stipend Deposit
	M	F			
50	11	39	Box making, Ludo game, slipper making, book binding, zari work.  Rag Picking Working Hours 9a.m. to 6 p.m. 6 days a week (Mon-Sat)	Rs.150-200/- or more during the festival week	50

### **Capacity Building of Community Leaders Supported by Action Aid India**

The program was implemented in the 7 districts of West Bengal viz. Purulia, Bankura, Howrah, Kolkata, N 24 Pargana, Murshidabad, Jalpaiguri/ Alipurduar. This was on of the most successful programs of Tiljala Shed.

1. Aid the formation of CBOs in the field areas.
2. Help them organize programs for the community members.
3. Providing them with intellectual support over issues and encourage them to self finance their organization.
4. Orient CBOs to follow a strand of leadership which will de centralize power.
5. Monitor activities closely and ensure that the leaders of such CBOs are politically sensitive and are assessing the situation well; Their decisions and judgments are not influenced by any other factor than the development and protection of his/her community.

Since the conception of the “Capacity Building of Community Leaders” in the month of May 2012 we have aimed at aiding the formation of CBOs and peoples organizations at the grass root level. After working with the various communities across seven districts of West Bengal ( Purulia, Bankura, Howrah, Kolkata, North 24 Parganas, Murshidabad and Jalpaiguri ) for over twenty months we have observed that in almost all the districts there has been a change within the mindset of the people.

We have put forward the major notable events, positive and negative changes and our learning from the progress as a part of this report. The Major events which the community leaders in all the pockets of the seven districts have participated are:

1. Pre Panchayat election campaigning.
2. Panchayat elections.
3. Post Panchayat election sansad sabhas proactive participation in arranging it and expressing their demands in it.
4. Organizing themselves into groups, peoples organizations, CBOs etc.
5. Organizing protests, meetings, enforcing constitutional means of putting forth their demands from the administration at Bankura, Purulia and Howrah districts.

During the Pre Panchayat election phase six districts except for the fields in Kolkata were engaged in a pre election awareness drive. We covered in all

3 G.Ps in Jalpaiguri district  
5 G.Ps in Bankura  
4 G.Ps in North 24 Parganas  
3 G.Ps in Howrah  
2 G.Ps in Murshidabad  
3 G.Ps in Purulia

In total the Community leaders supported and lead by the respective fellows have covered over 20 G.Ps and over 70 villages of our operational area. All of which belong to extremely vulnerable groups of people.

The results were very positive... during the election most of the villagers from our operational areas made a conscious political choice of choosing their favourite candidate judging them on their ability to represent the village and not under the influence of any other sort of pressure mounted on them by the various political parties. We came to such a conclusion based on the study of the number of our political leaders playing key roles during the elections. Many stood as candidates and a few even won majorities. Since we were following our leader's activity and intentions we made a digest of their importance and their political goals.

Observations from the POV of a facilitator and our learning:

The political parties who till now have been the representatives of the common man have not represented 'them' instead they have forced the common man to serve the party and have divided 'the deprived' for the sake of loyalty to the party ideology and to safe guard its own vested interest. In a single sentence the political parties have in a way reversed the idea of democracy. The party does not represent the people any more rather the deprived people fight mindlessly for the party interest.

The common man from these areas of intervention has understood that the only way to make the government accountable through unification of the common people under a banner which is beyond the ideological hegemony of any political party; a unified body of common people representing themselves through their own community leaders. Accordingly they conceived their own Organizations in various districts of West Bengal. The formation of such Organizations have not been administered or guided by any NGO as it had been happening in the recent past. Instead this time a more organic approach was adopted. The idea of a social movement was revised within the minds of our fellows and policy makers. Smaller yet effective and politically sensitive groups of villagers and marginalized people were huddling together and bringing in changes. No matter how small they may appear (such as a tube well which was installed in an area or a foot bridge that got repaired, or a community hall that got built etc for details refer to reports) but they are indeed noteworthy as such changes are changing the course of the life for these deprived lot.

The bridge over the canal, the tube well and the pipe line supplying potable water shown in the pictures above, in Topsia got built after the community consistently pressurized the administration.

**It is a life line for the people.**

The pictures above are of the voter ID card application drive that the community people of Topsia, Tangra and Tiljala Organized. It was aided by our Senior fellow Mijanoor Rahman Mandal over 200 applications were filed during the drive and the community went on to submit the papers which were initially refused at the head quarters at Jessop Building.

**Awareness generation programme on water born and vector born diseases and scientific plastic waste disposal systems in Rajpur Sonarpur Municipality Area supported by Kolkata Urban Services for the Poor (KUSP)**

The Project was implemented in Rajpur - Sonarpur Municipality covering all the 35 wards. After discussing the inherent problems prevalent in the area with the Health Officer of this municipality the following burning issues were identified - water born, vector born diseases like malaria, Dengue, diarrhoea etc. was rampant and needed immediate attention-awareness on prevention and treatment. The communities have very little awareness about proper plastic disposal especially carry bags. In this project we intervened in these areas to make life more habitable and free from the menace of environmental pollution viz. plastic free. The functionaries of the Rajpur- Sonarpur Municipality were very cooperative and they extended all possible support to make this project a success.

The outcomes and impact of the project was commendable. As many community people are not aware about the water born and vector born diseases, the introduction of the awareness camp programme will make them aware about the pros and cons of these diseases that will help to reduce the number of affected people in the operational areas. Besides they will also be aware about the scientific disposal of plastic waste which is primarily responsible for clogging the sewage system. Plastic pollution is a serious threat to the environment. The distribution of IEC materials of at least 200 families in each ward has helped the population of the ward to be aware about these specified diseases. Empowerment of the community health workers deployed by Urban Local Body with modern techniques and orientation about three topics like water born and vector born disease and scientific plastic disposal was very effective and we could reach a large number of people.

**Pantaburi Folk Lore theatre (Supported by Ministry of Culture, Govt. of India)**

**Pantaburi** is a unique form of performance collage presentation which brings alive the inherent beauty & depth of Bengali folk tales. It represents the timeless journey from struggle of a group of underdogs to a win. **Pantaburi** has the eternal expression of art in varied forms, being universal in time, space, emotions and human relationships.

Around 450 plus people attended the event. Ms.Helen La Fave was the Chief Guest for the evening. Many intellectuals and dignitaries and various schools attended and supported the event wholeheartedly. The program was funded by Ministry of Culture, Govt. of India. Our children participated in the event expressing their talent and surpassing our expectations.
